Subject: Invitation to Support our annual cerebral event "The 24th Regulatory & Policymaker's Retreat (Special Focus: Use of Artificial Intelligence and Machine Learning Technologies in the Electricity Distribution Sector)"

Dear Sir,

We are pleased to invite your organization to support the 24th Regulatory and Policymaker's Retreat planned from the 8th to 11th February 2024 at Shoonya Farm Retreat, Belgaum, Karnataka.

This year we will be focusing on *how the use of New and Emerging technologies can help reduce costs and improve the efficiency of the Electricity Distribution Sector in India*. We will be having experts conducting a live demonstration at the event on how Artificial Intelligence and Machine Learning technologies can be leveraged to optimise various facets of the Distribution Sector and help the Electricity Distribution Companies.

Apart from this, the conference will also be discussing the **Path to a Nett Zero India**, the **Regulatory and Legal Challenges of the Sector**, Emerging Technologies such as **Energy Storage, Nuclear & Green Hydrogen**, the **Electric Vehicle Infrastructure** and its adoption within the Electricity Act, 2003 to name a few.

We would be very grateful if your organization can support this event which is taking place in your home state of Karnataka and participate in discussions which can help bring positive changes in the Sector both in the State of Karnataka and the entire Nation.

Further, we would also appreciate, if you could communicate to us any topic/issue with respect to the Electricity Sector, which is of importance and should be discussed at the event.

We have attached the Sponsorship and Delegate Program for the conference with this letter and would be extremely grateful to have your support for the event.

About the Event:

IPPAI has conducted significant conferences over the past 25 years, encompassing more than 300 conferences that delve into various critical topics within the power sector. Of these, the Regulatory and Policy Makers Retreat (RPR) has been our flagship event.

The focus of this conference includes subjects which would be of great interest to Policymaker's and Regulators, such as, using the latest **Artificial Intelligence and Machine Learning techniques to reduce losses for DISCOMs** in the power sector. The event will have a live demonstration of some of these techniques.

Further, there will be a debate on the use of **Nuclear & Small Modular Reactors** to meet the Renewable Energy targets and at the same time bypassing the challenges posed by the Wind/Solar projects which need Storage to effectively be available as per the demand curves. Small modular reactors are in a position to give a Must Run Plant Load Factor (PLF) of 95% as compared to the Wind/Solar PLF of 20 to 25% at best.

The event also deep dives into areas such as **Carbon Credits and its Trading**, **IRECs** and the New Technologies and Innovations available to the Power Sector to meet the challenges of increased Energy Demand while striking a balance with respect to climate change.

Along with this, eminent lawyers are also going to discuss important **Legal and Regulatory Issues in the Power Sector**.

The event will have a participatory format, where stakeholders from the power sector including Regulators, Policymaker's, Public and Private Sector, will discuss these various issues and seek to find better solutions for the power sector through informed discussions.

We are also happy to inform you that the event will also be powered by Artificial Intelligence, which will be used for better knowledge dissemination and will be the first of its kind in the Power Sector.

The major topics with respect to the Power Sector Include:

- *Integration of Renewable Energy into the Incumbent Thermal Dominated Grid*
- *Regulatory and Policy Challenges of Scheduling Intermittent Renewable Power*
- *Solutions for Reducing DISCOM Losses*
- *Expansion of Transmission Infrastructure*
- *Importance of Derivatives in the Power Sector*
- *Challenges faced by Developers of Renewable and Conventional Power Projects*
- *Small Modular Reactors*

The major topics with respect to the Nett-Zero Mission Include:

- *Energy Storage*
- *Electric Vehicle Infrastructure and Status under the Electricity Act*
- *Carbon Trading Policy, RECs & ESG Compliance*
- *Nuclear, Green Hydrogen, Electrolyzers & Biogas*

We do hope this event will be of interest to you and request you to write to us at gulrez@ippaimail.org or call/text us at +91 973969 4242 to confirm your participation.

We look forward to your favourable consideration and receiving your confirmation and kind acceptance of this invitation. A splendid and cerebral time is guaranteed for all.

Yours sincerely,

Harry Dhaul,
Director General, IPPAI

CC: Additional Chief Secretary, Energy, Govt of Karnataka & Managing Directors of ESCOMS.
